

Here we go again! The NAB is trying to stifle the competition, again, by using its deep pockets lobbyists and political power and stepping all over the 1st. amendment in the process. I'm an over the road trucker and the traffic and weather news I recieve from XM radio is something that I rely heavily on, as do thousands of other truckers. XM radio is a unique service that cannot be duplicated by any other radio service out there. I vehemently oppose HR 4026.
